**Fellow Red Angus Breeders and Friends:**

I want to start by thanking all our past and future customers. As your seedstock partner, we know the difficult task of selecting quality genetics, that work for your operation. We know that everyone has different qualities that are most important to them. We understand that your family's livelihood is ultimately determined by pounds on the truck, and we feel our responsibility to do our part by helping you have heavier calves, better carcass quality, and trouble-free mother cows. We strive to identify and produce animals that optimize performance and minimize production obstacles in your herd and ours. At the end of the day, the cattle business is about you, our friends and partners.

The Bulls in this years sale have been hand selected from our entire bull calf crop. They represent the top 30% of all bulls born at Sutherlin Farms. Each bull in the sale has been hand selected based on soundness, structure, docility, performance as well as calving ease, growth and maternal. All bulls are sold guaranteed and have passed a breeding soundness exam. All bulls have been tested negative for BVD and parentage verified with the Association. We will have ultrasound measurements available for carcass data before the sale.

The bulls are fed in our own bull development feedlot on hay, silage, oats, corn, and a protein supplement ration. The protein supplement is a blend of natural by-pass proteins that provide essential amino acids for improved feed conversion. This means we get the desired gains using less grain. It also helps produce more muscle and less fat. This ration is designed for a 3lb/day gain.

There will also be a fancy, fancy set of home-raised commercial yearling replacement heifers that will follow the bulls in the sale. These heifers are raised right alongside of the heifers that we keep as our own replacements. When selecting for replacement females we are selecting for the same traits as the bulls but focusing on feet and udder qualities. The replacement heifers are fed a maintenance ration in the feedlot to condition them for breeding. The average weight on the heifers is 800 lbs.

Feel free to stop any time before the sale to look at the cattle. Calving has started, and someone will be around whenever it is convenient for you. Please join us on Friday, March 1st, at the Ranch feedlot. Lunch will be served starting about 11:30 and the sale starts at 1 PM (MST). We hope to see you there!

# A-BAG-A-BULL

If you purchase a bull from us, we will provide you with credit equal to the value of one bag of Feeder Calf Certification Program or Allied Access tags for each bull you purchase. To redeem your credit, bring your receipt for the tags to next year's sale and we will apply it to your bull purchase.

The FCCP provides age, source and genetic verification for calves sired by registered Red Angus bulls. Cattle enrolled in the FCCP are accepted into the exclusive Choice+ and G.O. Red grids. The FCCP 'yellow tags' are recognized by buyers nationwide and return a premium for Red Angus calves enrolled in the program.

The Allied Access program provides age and source verification for commercial cattlemen whose bull battery does not exclusively contain registered Red Angus bulls. Whether you are utilizing multiple sire breeds or halfblood bulls, enrolling in Allied Access demonstrates to buyers that you are taking an extra step in marketing your calves and adding value throughout the production chain.

To enroll in the FCCP or Allied Access, contact the Red Angus marketing department. Enrollment is simple and free of charge.

# COMMERCIAL HEIFERS

Lots 81-225 are the commercial heifers. The heifers offered here are all home-grown and have NO brands. The heifers have had their pre-breeding vaccinations and have been deliced. The heifers should weigh approximately 800 lbs. on sale day. They will be grouped in pens of 30 and sold in lots of 5. We will bring into the ring the first 5 heifers from each pen. They will represent the entire pen. The successful bidder will then have the right to take as many of the heifers in this pen, in 5 head increments, as he wants at the same price as the first 5 lots. Thus, he could buy 5, 10, 15, 20, 25 or 30 heifers in one bid.

# RED ANGUS GUIDE TO EPDS

RedAngus.org

**ProS** ..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB** ..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM** ..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED** ..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW** ..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW** ..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW** ..... Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG** ..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI** ..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK** ..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**ME** ..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

**HPG** ..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

**CEM** ..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY** ..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB** ..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG** ..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW** ..... Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA** ..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT** ..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
